

World Learner School YES! Team
Schedule 2019-2020
Tuesdays 4:00 PM - 5:30 PM
Middle School Science Room

YES! is a unique youth program that develops youth leaders while inspiring widespread adoption of renewable energy technologies, waste, and energy conservation best practices, local foods, habitat restorations, and water quality and conservation improvement projects. In addition, students are gaining leadership and workforce skills such as problem solving, communication, teamwork, innovation, and project management. In 2007, [Prairie Woods Environmental Learning Center](#) (PWELC) partnered with [Southwest Initiative Foundation](#) (SWIF) to develop and implement Youth Energy Summit (YES!) as a program in response to emerging issues and opportunities around renewable energy, climate change, energy efficiency, and conservation. Today, as Youth Eco Solutions, YES! seeks to be part of the solution to today's ecological challenges through hands-on action projects.

YES! Mission:

Empowering youth to create solutions to today's ecological challenges through hands-on projects.

YES! Vision:

Our vision is for the YES! program to be a highly successful model for both youth engagement and social change, empowering youth to drive the vision for YES! towards achieving sustainable best practices in their community.
